## The Hub for Subs

Are you a child care worker in B.C.? Join the herd for free to work where you want, when you want, with no long-term commitments.

This is not an agency. LlamaLink is a cloud-based web app, utilizing a database and automatic alert system for child care centres and substitutes to make quick and easy connections with each other. As the network of licensed centres grows, you can request to join any substitute lists you choose. Set your availability once and share it between all your joined centres!

Some benefits for substitutes registered with LLAMALINK include:

- easy access to profiles of licenced child care centres which are actively searching for quality substitutes.
- setting your availability ahead of time to avoid unwanted shift requests.
- up-to-date shift and availability calendars.
- you can easily accept or decline a shift with the click of a button.

Please explore the website to learn more about this unique system.
